UNIVERSITY OF WATERLOO
FACULTY OF APPLIED HEALTH SCIENCES

ROAD MAP

- The UbiLab
- Smart Home Technologies
- Current Work
- Discussion
- Recommendations
- The Future

WHAT IS SMART HOME TECHNOLOGY?

- “a home outfitted with technology that can communicate and be controlled from another location”
- **ecobee** smart wi-fi thermostat

RECOGNIZE THESE BRANDS?

Google Home

nest®

eugust

wink

PHILIPS

🍏 WATCH

CONCEPTUAL FRAMEWORK

Collect

- Sensors collect data (presence, step, heart rate, sleep, etc.)

Monitor & assemble

- Compile data in real-time and upload to the cloud

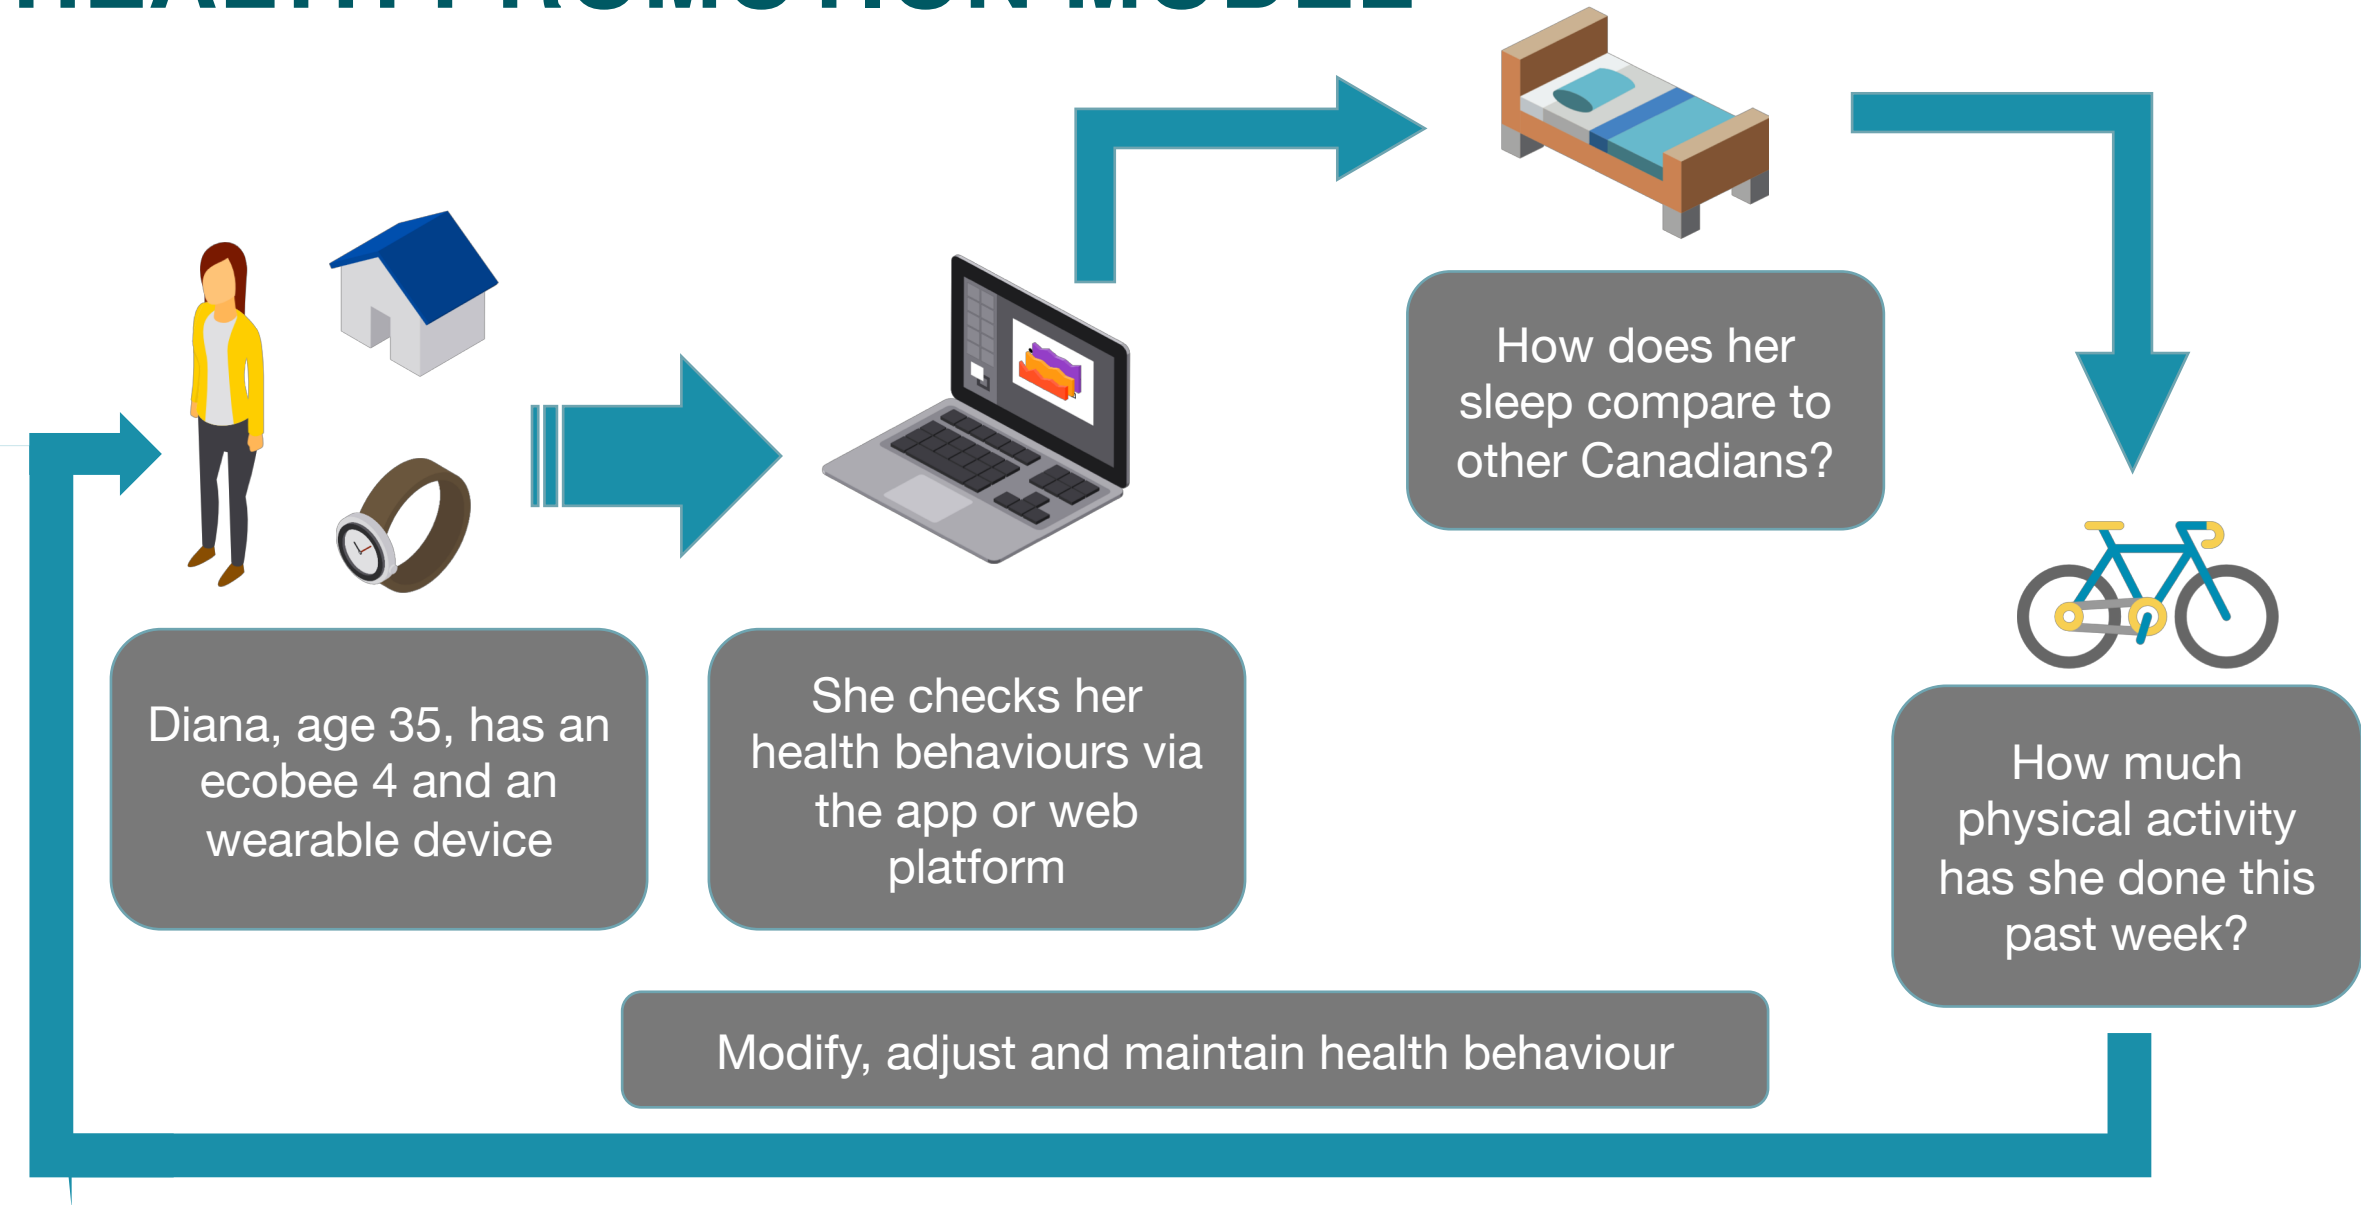

Analyze

- Analyze data generate holistic view of health

Promote

- Data visualized in dashboards, providing actionable feedback

HEALTH PROMOTION MODEL

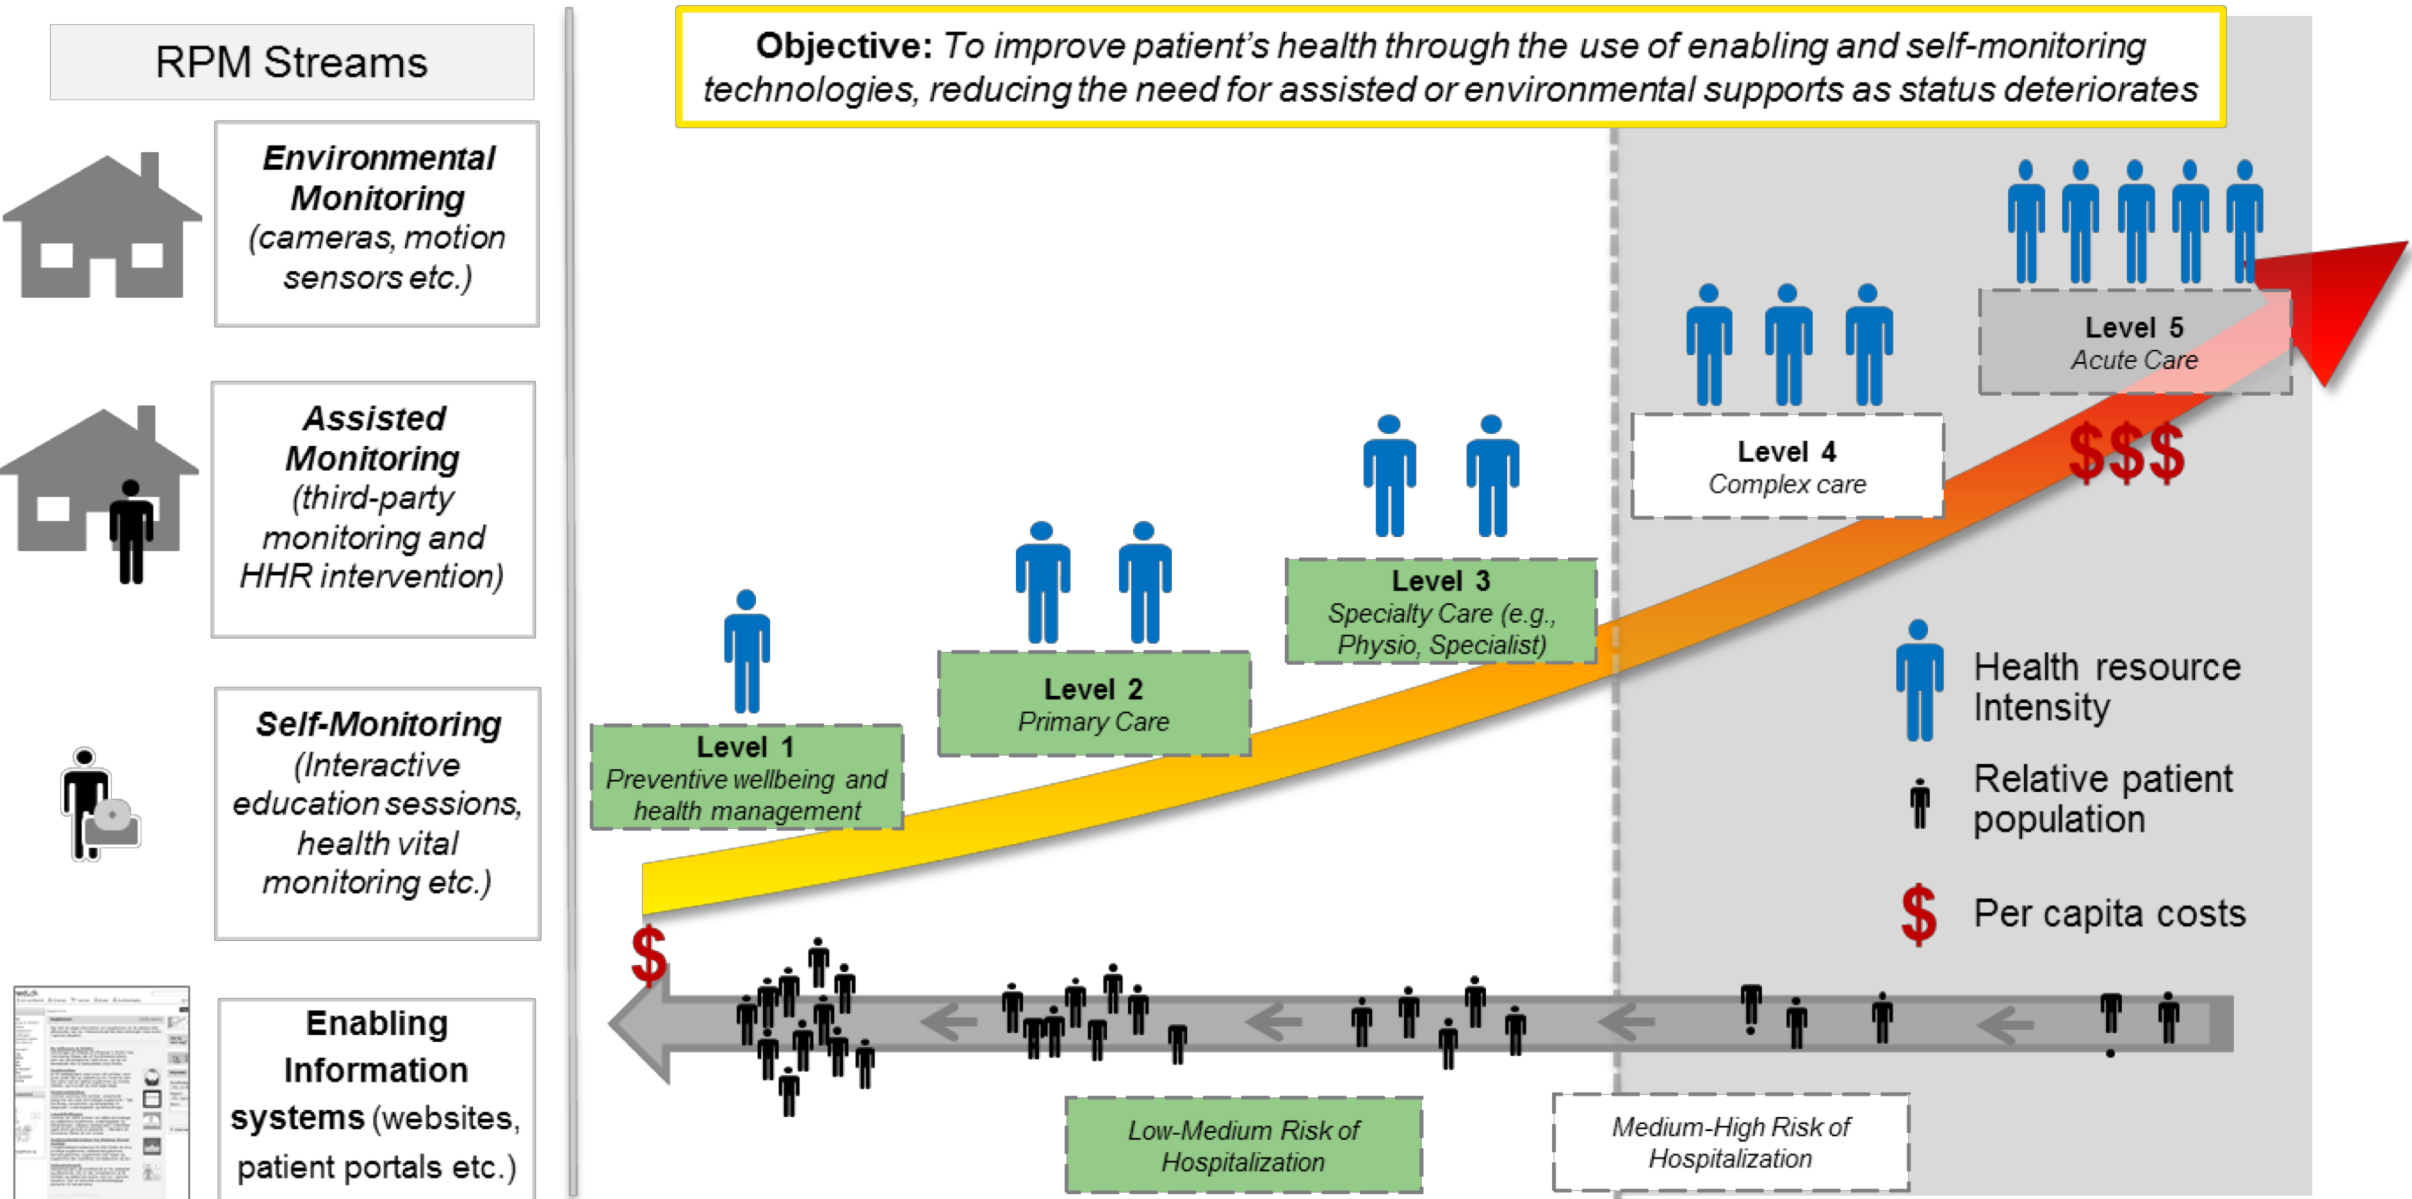

PUBLIC HEALTH SURVEILLANCE

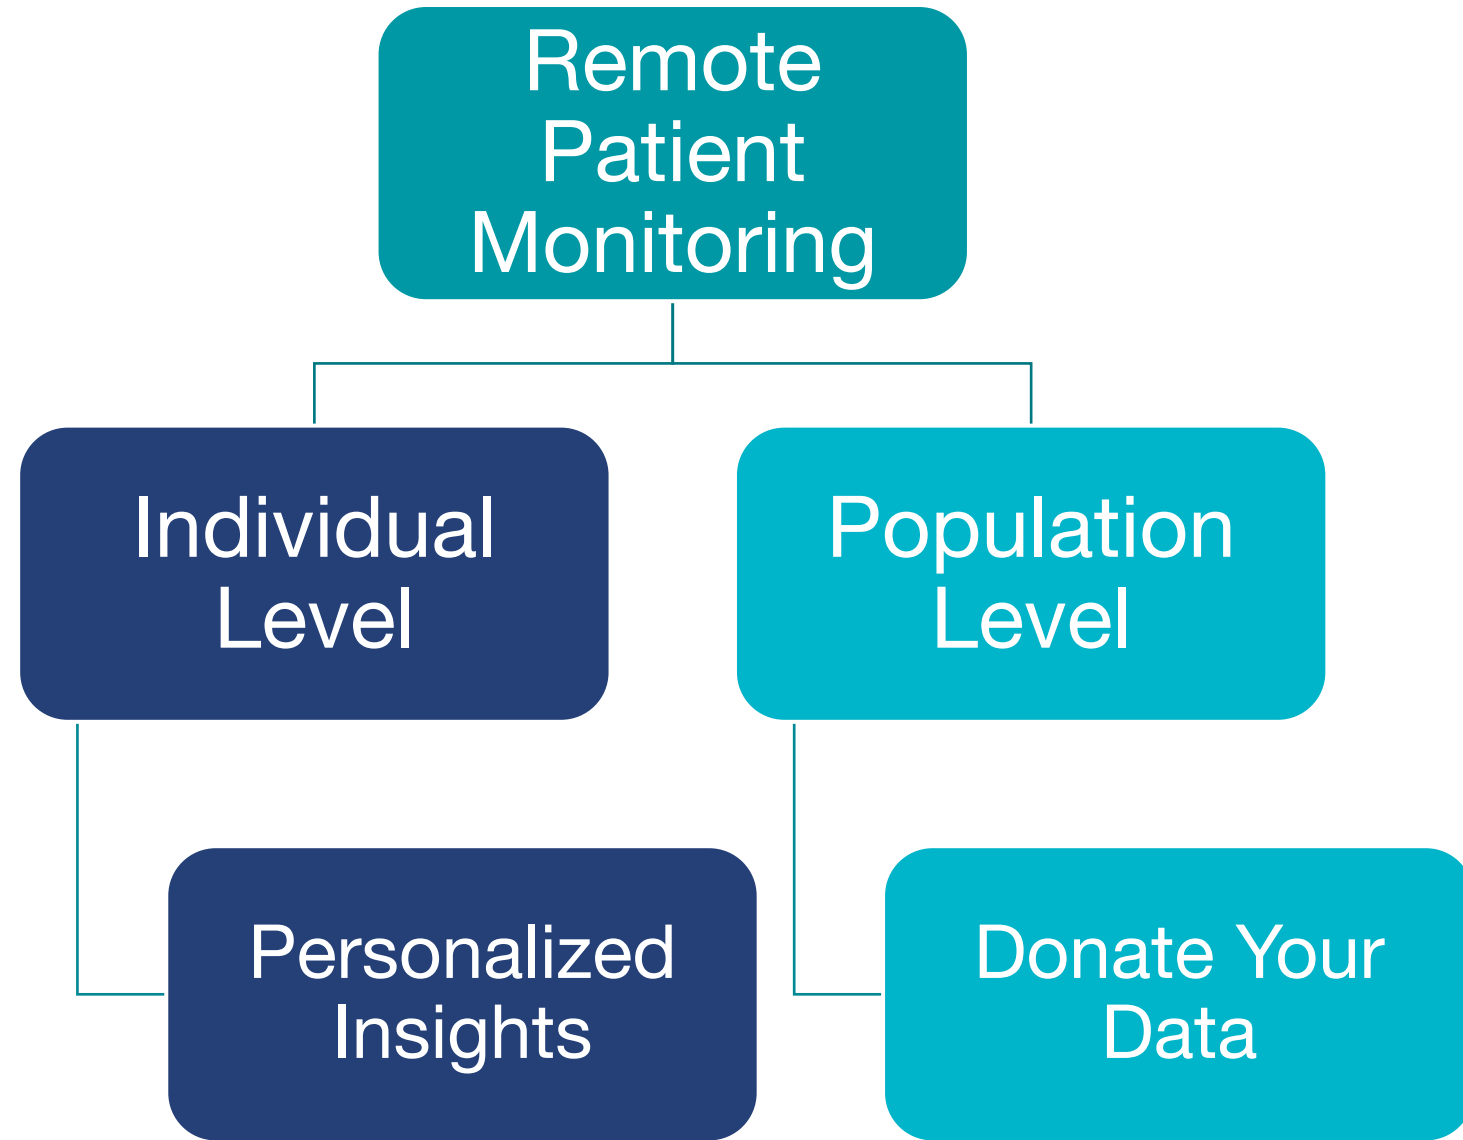

*“The **continuous, systematic collection, analysis and interpretation** of health-related data needed for the planning, implementation, and evaluation of public health practice.”*

- “Triple aim” of health care
 - Improve patient outcomes
 - Improve access to care
 - Make health care systems cost effective

REMOTE PATIENT MONITORING (RPM)

INDIVIDUAL & POPULATION LEVEL

ZERO-EFFORT DATA COLLECTION

HEALTHY BEHAVIOUR DATA CHALLENGE

SENSORS

Sensors in the home and wearables will collect health data

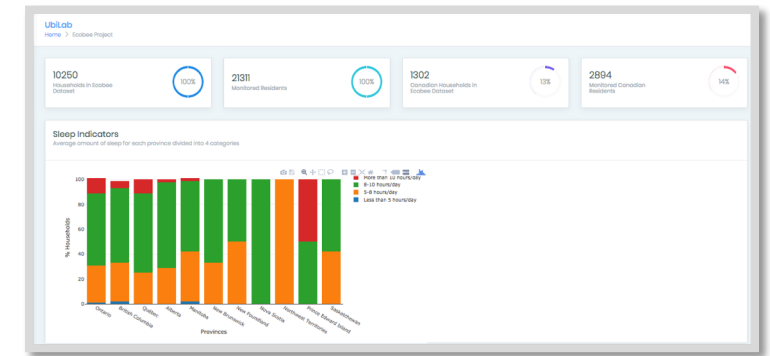

Public Health
Agency of Canada

Agence de la santé
publique du Canada

PUBLIC HEALTH OFFICIALS

Public Health officials will have access to database of compiled data (include PASS Indicators)

DASHBOARD

REAL-TIME

Population level health data will be monitored in near real-time

MOVING FORWARD

- Building a platform for data visualization
- Bringing insights and evidence based health information to users and public health officials
 - Mobile app
 - Dashboards

METHODOLOGY

Pilot study

- Fitbit data
- ecobee data

8 participants
386 person hours

DYD dataset

- Metadata
- Thermostat data

21,311 participants
10,250 households

Correlation between fitbit and ecobee

Visualization of the fitbit and ecobee dataset (5 minutes interval).

Health Indicators

Canadian household trends for sleep, physical activity and sedentary behaviour from January 2015 to March 2017 from ecobee data.

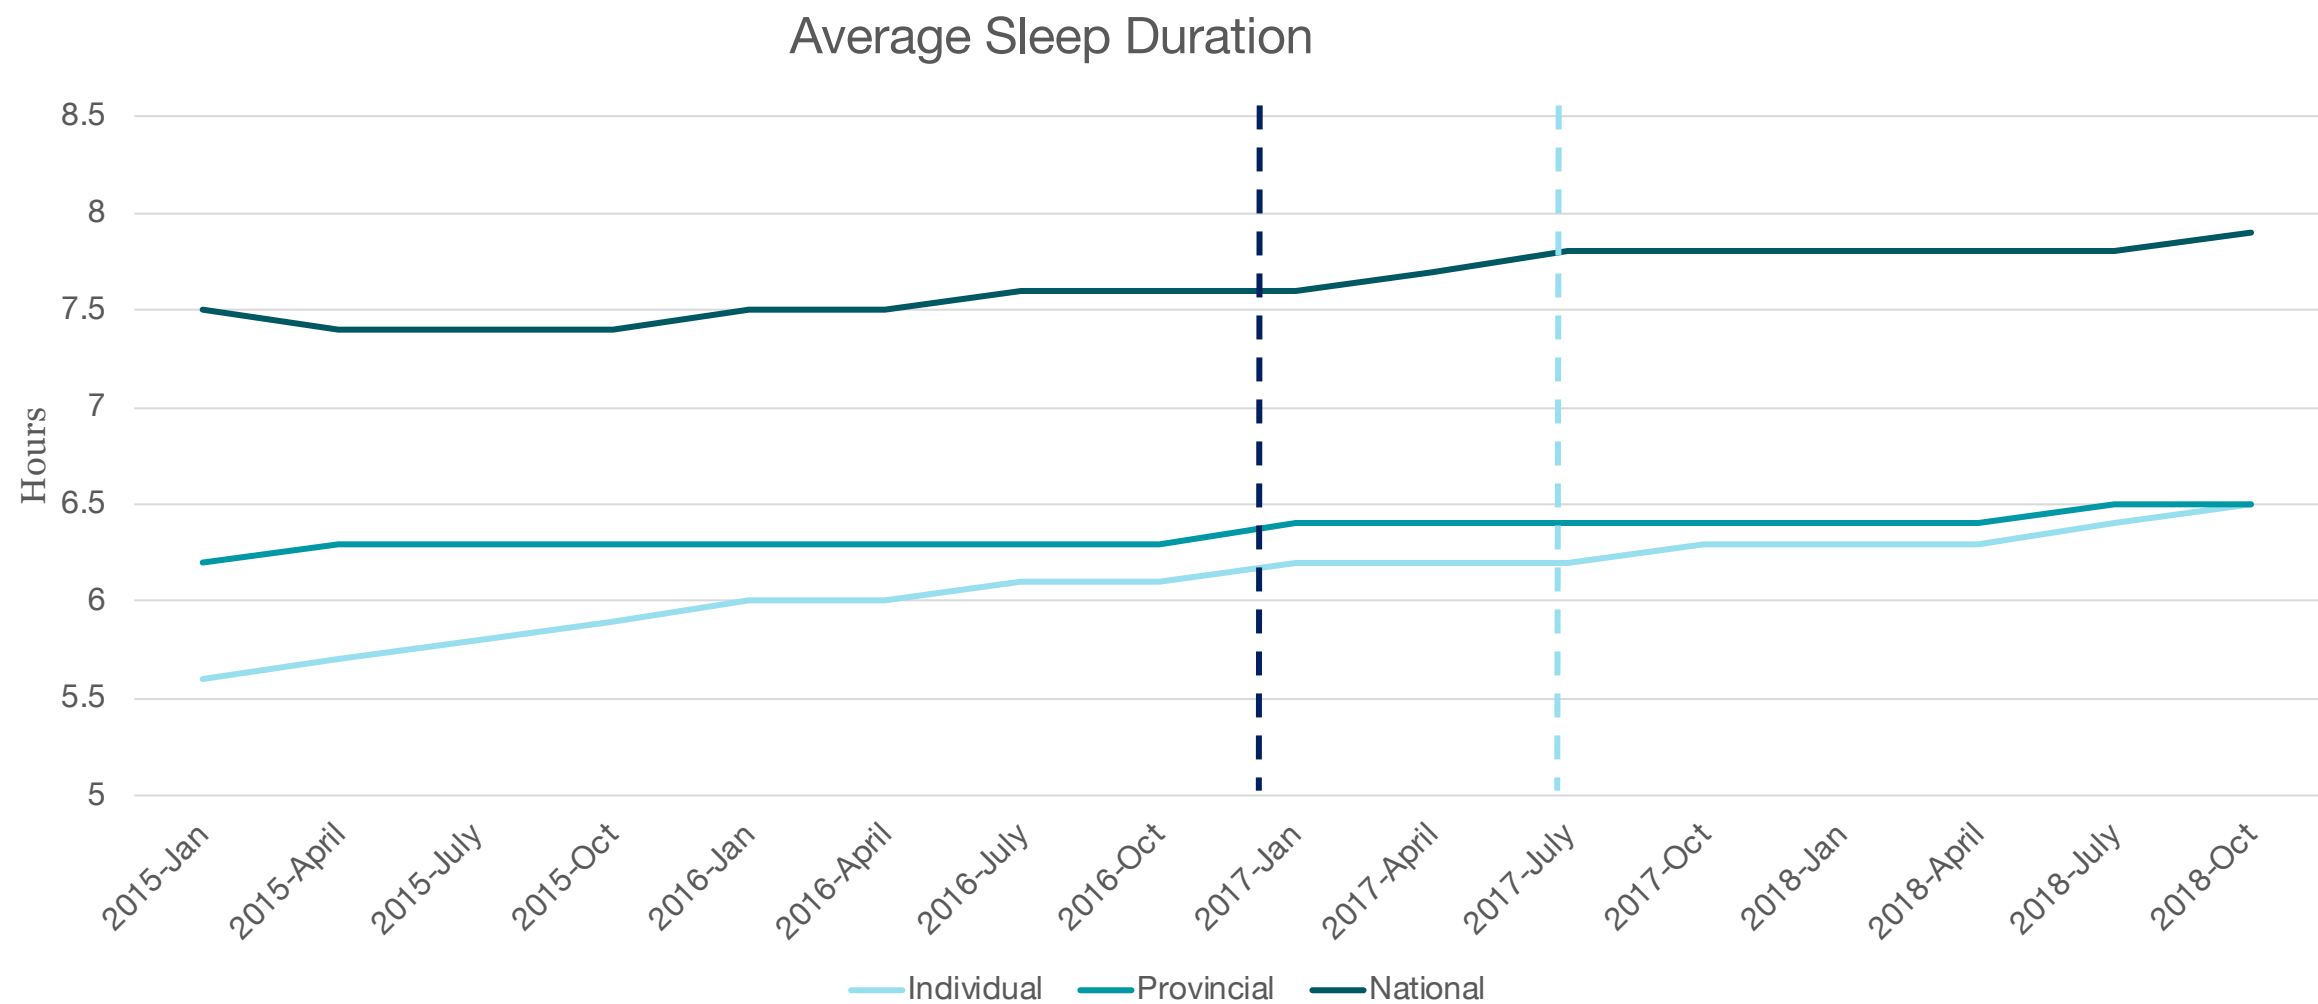

Sleep Indicator

Provincial breakdown of average sleep duration

POTENTIAL ANALYSIS FOR REAL TIME MONITORING

ADVANTAGES

- Zero-effort/ unobtrusive for participants and users
- Real time data collection and analysis
- Individual level personalized feedback

HEALTH PROMOTION STRATEGIES

- Compare healthy behaviours and incentivize individuals with personalized goals
- Create peer-to-peer groups and build motivation to achieve healthy behaviours
 - Example carrot app to improve physical activity
- Monitor the effectiveness of health promotion interventions

CURRENT CHALLENGES

- Interoperability
- Data governance and access to data
- Public health governance/organization

ACKNOWLEDGEMENTS

- UbiLab Team
- ecobee

MOVING FORWARD

How is **UbiLab** using **ecobee** to understand population health

Public Health Surveillance

Decision makers are able to access statistics in order to plan better interventions.

Sleeping pattern

Help users understand their sleeping habits.

Evaluate the impact of technology on sleep patterns.

Sedentary Behaviour

Help users quantify their sedentary behaviour.

Understand the amount of sedentary time of the Canadian population.

Physical Activity

Help users monitor their in-home physical activity.

Assess the effectiveness of physical activity programming.

Smart Living

Technologies like ecobee can be used to enable our healthcare system to be more proactive and family members to remotely care for their loved ones.

Emergency alert!

Help people with limited mobility

Ubilab

The Ubiquitous Health Technology Lab is developing algorithms to translate ecobee data into healthcare data-driven insights.

1

Anonymous sensor data is collected by the ecobee thermostat.

2

The UbiLab processes the data using machine learning and statistical models to convert data into healthcare insights.

3

Anonymized data is provided to decision makers in the form of a cloud-based dashboard.

Emergency Services

Health care providers

Public Health Officials

Policy Makers
